

ULTIMATE SOLUTION TO PROTECT FROM WATERDROPS

Tokina

Hydrophilic Coating Filter PROTECTOR

Hydrophilic Coating

- When water hits the filter, it spreads into a film over the glass instead of forming droplets. This helps to maintain a clear view under a variety of weather conditions and for taking photos or video around water.
- Through a special treatment of the hydrophilic surface, the filter is also self-cleaning device.
- This self-cleaning filter helps to keep clear and define every last reflection for the best of all light, improving the life and performance of the filter.

Ultra Clear - Hardened Optical Glass

- Ultra Clear High Transparency Optical Glass (Fluoropolymer)
- The Round glass Hardened Optical Glass (Chemically Enhanced Ippack Glass) is 4x Stronger than Normal Optical Glass.

Available Filter Sizes

Round sizes: 77, 82, 88, 95, 105, 112, 127
Square: 4 x 5.88 inch / 101 x 148 mm
