BESCHRIJVING

Integrated Amplifier.

With a class G amplifier, toroidal based power supply, acoustically damped chassis, paralleled transistor output stages and exceptionally low levels of distortion and noise the A49 is capable of reproducing music with all its original authority and detail. The A49 features dual mono volume controls and a balanced signal path all the way through the product together with distortion nulling input multiplexers. Rest assured you will be hearing the music just as the artist intended.

The A49 has been designed to leapfrog the competition with a massive 200 watts per channel into 8 ohms and 400 into 4 ohms. It delivers 50 watts in pure class A mode while allowing for huge extra power reserves from our latest generation class G topology that is both clever and efficient. During normal operation, distortion is measured in less than one part per million so that this massive power is delivered with total control and finesse.

- Arcam's highest performing amplification ever
- Fully flexible stereo amplifier range
- Power amp can be configured for multiple modes
- Class G amplification with 50W of class A operation
- On board PSU for rSeries products
- CR902 system remote control (A49, C49)
- Phono input configurable for line/MM (A49, C49)
- Large ergonomically designed aluminium knob
- Low power 0.5W standby

SPECIFICATIES

Aansluitingen

| | |
|--------------------------|---|
| Aantal phono-ingangen | 1 |
| Hoofdtelefoonaansluiting | ✓ |
| Pre-out | 1 |

Algemeen

| | |
|-----------------------------|--|
| Aantal audiokanalen | 2 |
| Type versterker | Geïntegreerde versterker, Stereoversterker |
| Uitgangsvermogen per kanaal | 200 |

Energieverbruik

| | |
|--------------------------------|-----|
| Elektrisch verbruik (stand-by) | 0,5 |
|--------------------------------|-----|

Fysieke kenmerken

| | |
|---------|-------|
| Breedte | 43.3 |
| Diepte | 42.5 |
| Gewicht | 19,7 |
| Hoogte | 17.1 |
| Kleur | Zwart |
