BESCHRIJVING

Low-volume shorts that fill the gap between summer race bibs and spring/fall knickers—for pros and serious year-round riders—with their insulating materials and aerodynamic fit.

FEATURED FABRICS

The shorts' thigh panels are constructed with our brushed-back OSMOS Heavy textile, featuring a fleecy interior that's highly insulating, breathable, and super soft against the skin. The warp-knit outer acts as the "shell" of the shorts, further supporting your leg muscles with its compressive structure. SPHERE Ultra is applied in our double-layer twinDeck construction to the front panel, locking out icy cold air.

CONSTRUCTION/FIT

Constructed using the S9 raceFit platform, the shorts employ our A-Lock Engineering framework for maximum stability and to secure the insert in place as you pedal. Our rollBar bib straps, ergoBox, and one-piece Butterfly panel join forces as your weight transfers in the saddle, ensuring frictionless comfort and stability during high-output efforts.

WHEN/HOW TO USE IT

Wear them alone in cool spring/fall conditions, or dial up the warmth and coverage by pairing them with knee or leg warmers in colder/wetter conditions.

ACHTER HET PRODUCT

Voor de rekbare herfst- en lenteseizoenen wanneer het bulkvrije comfort en de veelzijdigheid die race shorts bieden nog steeds de voorkeur hebben, maar met extra dij-warme bescherming. Draag ze alleen in koele lente/herfst omstandigheden, of kies voor meer warmte en bedekking door ze te combineren met knie- of
